```
1 public int[] sort(int[] numbers, int length) {
2     if (length < 2) {
3         return numbers;
4     }
5     int mid = length / 2;
6     int[] left = new int[mid];
7     int[] right = new int[length - mid];
8
9     for (int i = 0; i < mid; i++) {
10        left[i] = numbers[i];
11    }
12    for (int i = mid; i < length; i++) {
13        // INSERT MISSING CODE
14    }
15
16    sort(left, mid);
17    sort(right, length - mid);
18
19    return merge(numbers, left, right, mid, length - mid);
20 }
```
